## REASONS FOR ALLOWANCE

1. This is an Examiner's Statement of Reasons for allowance. The closest prior art of record (Pierce et al. U.S. Pat. No. 6,154,733 discloses an inventive concept of printing a postage system, comprising a computer, a data center and a control system.

**Herbert, Raymond John EP 000933730A2** discloses a postage meter with an authorized digital print head. IBM Technical Disclosure Bulletin discloses a postal scale having a speech recognition feature, operating with a speaker-independent, continuous-speech recognition system, which can be used immediately after the user walks up to the device.

However, neither IBM Technical Disclosure Bulletin nor Herbert and Pierce singularly or in combination fail to anticipate or render obvious the recited features: "a data center in operative communication with the printing system, the printing system being located remotely from the data center, the data center including a plurality of advertiser accounts, each of the plurality of advertiser accounts including respective message data representative of a message, and a control system in operative communication with the data center and the printing system for obtaining recipient information, and using the recipient information to identify a subset of messages available for printing on the item".
